The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/043,879

Applicant(s)

FAGAN ET AL.

Examiner

Beemnet W. Dada

Art Unit

2135

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 3/15/07.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 3-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 3-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

1. This office action is in reply to an amendment filed on 03/15/2007. Claims 10 and 16 have been amended. Claims 1 and 3-16 are pending.

Response to Arguments

2. Applicant's arguments filed 03/15/2007 have been fully considered but they are not persuasive.
3. With respect to claim 10, applicant argued that Lockhart fails to teach the newly added claim limitation, "wherein said customer has not access said second web site prior to said receiving said authentication message at said second web site". Examiner disagrees.
4. Examiner would point out that Lockhart teaches, when a customer tries to access a second website and if it is determined that the customer has not been authenticated, the user is authenticated using the proper website (i.e., said customer has not accessed the second website prior to receiving authentication message) [see Lockhart, page 14, steps 2-4].
5. With respect to claims 1 and 16, applicant argued that Lockhart fails to teach 'after authentication, receiving a selection from said customer at said first web site requiring transfer to a second web site". Applicant further argued that Lockhart fails to teach after generating said authentication message, transferring said authentication message from said first website to said second website for authentication of said customer.

Art Unit: 2135

6. Examiner would point out that Lockhart teaches authenticating a customer at a first web site (i.e., source Web site) [page 14 , step 3]; receiving a selection from said customer at said first web site requiring transfer to a second web site (i.e., destination web site), and transferring said authentication message from said first web site to said second web site for authentication of said customer by said second web site [page 14, sections steps 5-8 and page 18, steps 1-5]. Furthermore, Lefler teaches a single sign on system, comprising the steps of authenticating a customer at a first website (i.e., signing onto the system) [page 16, 26-28]; after authentication receiving a selection from said customer at said first web site requiring transfer to a second web site, wherein said first web site is independent of said second web site (i.e., clicking on the 'US Economic Overview' article which is located on a different web site) [page 17, lines 4-16]; after receiving the selection, generating an authentication message of said customer at said first website, after generating said authentication message transferring said authentication message from said first web site for authentication of said customer by said second web site [page 17, lines 11-18].

7. Applicant further argued that the art on record fails to teach said authentication message devoid of intelligent information of said customer and comprising a permanent customer pseudonym that uniquely identifies said customer.

8. Examiner would point out that Lockhart teaches generating an authentication message for said customer at said first web site, said authentication message devoid of intelligent information of said customer and comprising a permanent customer pseudonym that uniquely identifies said customer and is devoid of intelligent information of said customer (i.e., **name assertion reference**) [page 14, steps 4-6 and pages 15-17, **Anonymity section**].

Art Unit: 2135

9. Applicant further argued that Lefler further fails to teach the deficiencies of Lockhart and further one would not be motivated to combine the reference to obtain the claimed invention.

10. In response to applicant's argument that there is no motivation to combine Lockhart and Lefler, a suggestion, teaching, or motivation to combine the relevant prior art teachings does not have to be found explicitly in the prior art, as the teachings, motivation, or suggestion may be implicit from the prior art, as a whole, rather than expressly stated in the references. The test for an implicit showing is what the combined teachings, knowledge of one of a whole would have suggested to those of ordinary skill in the art. In re Kahn, 441 F.3d 977, 988, 78, USPQ2d 1329, 1336 (Fed. Cir. 2006) citing In re Kotzab, 217 F.3d 1365, 1370, 55 USPQ2d 1313 (Fed. Cir. 2000). See also In re Thrift, 298 F. 3d 1357, 1363, 63 USPQ2d 2002, 2008 (Fed. Cir. 2002). These showings by the examiner are an essential part of complying with the burden of presenting a prima facie case of obviousness. Note In re Oetiker, 977 F.2d 1443, 1445, 24 USPQ2d 1443, 1444 (Fed. Cir. 1992). In this case the teaching of Lefler could have been employed within the system of Lockhart in order to allow an efficient and secure single sign on system.

Claim Rejections - 35 USC § 102

11. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 2135

12. Claims 10 and 13-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Hal Lockhart, "OASIS Security Services Technical COMMITTEE" May 28, 2001 (hereinafter Lockhart).

13. As per claims 10, 14 and 15, Lockhart teaches a method for secure mutual authentication comprising the steps of:

receiving at a second web site an authentication message for a customer from a first website, said customer previously authenticated by said first web site, said authentication message generated by said first web site [page 4, steps 3-], said authentication message devoid of intelligent information of said customer and comprising a permanent customer pseudonym that uniquely identifies said customer and is devoid of intelligent information of said customer (i.e., name assertion reference) [page 14, steps 4-6 and pages 15-17, Anonymity section], wherein said customer has not accessed said second site prior to said receiving said authentication message at said second web site (i.e., said customer has not accessed the second website prior to receiving authentication message) [see Lockhart, page 14, steps 2-4]; and

authenticating said customer at said second web site using said authentication message generated by said first web site (i.e., source Web site) [page 14, step 3], wherein said first web site is independent of said second web site [page 4, steps 4 and 5].

14. As per claim 13, Lockhart further teaches the method further comprising the step of generating said authentication message for said customer at said first web site [page 14, steps 4-6 and pages 15-17, Anonymity section].

Claim Rejections - 35 USC § 103

15. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

16. Claims 1, 3, 7-9 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hal Lockhart, "OASIS Security Services Technical COMMITTEE" May 28, 2001 (hereinafter Lockhart) in view of Lefler et al. WO-01/88733 A1 (hereinafter Lefler).

17. As per claims 1, 8-9 and 16, Lockhart teaches a method for secure mutual authentication comprising the steps of:

generating an authentication message for a customer at a first web site, said authentication message devoid of intelligent information of said customer and comprising a permanent customer pseudonym that uniquely identifies said customer and is devoid of intelligent information of said customer (i.e., name assertion reference) [page 14, steps 4-6 and pages 15-17, Anonymity section]; and

Lockhart further teaches authenticating a customer at a first web site (i.e., source Web site) [page 14, step 3]; receiving a selection from said customer at said first web site requiring transfer to a second web site (i.e., destination web site), wherein said first web site is independent of said second web site [page 4, steps 4 and 5] and transferring said authentication message from said first web site to said second web site for authentication of said customer by said second web site [page 14, sections steps 5-8 and page 18, steps 1-5].

Lockhart is silent on **after authenticating** receiving a selection, **after receiving** the selection generating an authentication message and **after generating** the authentication message transferring the message in the order claimed by claim 1. However within the same field of endeavor, Lefler teaches a single sign on system, comprising the steps of authenticating a customer at a first website (i.e., signing onto the system) [page 16, 26-28]; after authentication receiving a selection from said customer at said first web site requiring transfer to a second web site, wherein said first web site is independent of said second web site (i.e., clicking on the 'US Economic Overview' article which is located on a different web site) [page 17, lines 4-16]; after receiving the selection, generating an authentication message of said customer at said first website; after generating said authentication message transferring said authentication message from said first web site for authentication of said customer by said second web site [page 17, lines 11-18]. The cited portions of Lockhart and Lefler are directed to a single sign on system. It would have been obvious to one having ordinary skill in the art at the time of applicant's invention to employ the teachings of Lefler within the system of Lockhart in order to allow an efficient and secure single sign on system.

18. As per claim 3 Lockhart further teaches the method wherein the step of generating authentication message further comprises randomly generating said customer pseudonym (i.e., see for example, generating SAML assertions during a request, page 20,)

19. As per claim 7, Lockhart further teaches the method further comprising the steps of authenticating said customer at said web site using said authentication message generated by said first web site [page 14, sections steps 5-8 and page 18, steps 1-5].

Art Unit: 2135

20. Claims 4-6 and 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hal Lockhart, "OASIS Security Services Technical COMMITTEE" May 28, 2001 (hereinafter Lockhart) in view of Lefler et al. WO-01/88733 A1 (hereinafter Lefler) and further in view of Le Berre EP 0 940 960 A1.

21. As per claims 4-6 and 11-12, Lockhart teaches the method as applied above. Lockhart further teaches generating an authentication message for said customer at said first web site, said authentication message devoid of intelligent information of said customer and comprising a permanent customer pseudonym that uniquely identifies said customer and is devoid of intelligent information of said customer [page 14, steps 4-6 and pages 15-17, Anonymity section]. Lockhart is silent on incorporating a date/time stamp, a partner name and an optional URL with a return address for said web site into said authentication message. However, Within the same field of endeavor Le Berre teaches a single sign on system comprising: the step of generating an authentication message comprises incorporating a source identifier, a date/time stamp, an optional return URL, a customer pseudonym, a cryptographic key, a transaction identification and authenticated data for the first web site into said authentication message [column 6, lines 41-55 and figure 5] and further comprising the step of authenticating said customer at said second web site occurs when said customer has previously visited said second web site, and further comprising the step of prompting said customer to log in to said second web site when said customer has not previously visited said second web site [column 9, lines 1-19]. It would have been obvious to one having ordinary skill in the art at the time of applicant's invention to employ the teachings of Le Berre within the system of Lockhart and Lefler in order to enhance the security of the system.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beemnet W. Dada whose telephone number is (571) 272-3847. The examiner can normally be reached on Monday - Friday (9:00 am - 5:30 pm).

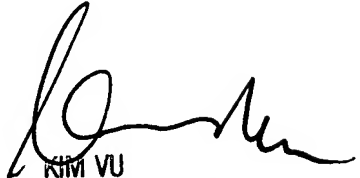

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Y. Vu can be reached on (571) 272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
